H2020-CIRC-2-2017

Water in the context of circular economy

## Full project title:

Demonstration of water loops with innovative regenerative business models for the Mediterranean region

## Deliverable: D57

*Relative Number in WP9 D9.4*

## Updated report on dissemination and communication

Due date of deliverable: 30/06/2023

Submission date of deliverable: 30/06/2023

## EXECUTIVE SUMMARY

This document contains a detailed Report of the dissemination and communication activities designed, implemented and delivered in the the whole duration of the HYDROUSA project (i.e., 60 months). The related goals, key outputs and targets of WP9 were extensively outlined and described on the Dissemination and Communication Plan (DCP) (D9.1). This updated report is showcasing the specific activities realised based on these described outputs and summarizes the collective effort based on sub-activities delivered by the partners of the consortium.

The deliverable was initially prepared at the Month 24 of the project, in order to evaluate the dissemination and communication strategy, report on the goals and revisit potential targets and was updated during the implementation as a live working document, capturing the dissemination results for this periodic report. This version is covering the full-time framework of the realisation of the project, outlining the impressive outreach and coverage of HYDROUSA, and its contribution to the transition to more circular and nature-based strategies, bringing the results to an extensive audience, from research, to innovation, to the community. The entire DCP is following the guidance of the H2020 “Communicating EU research and innovation guidance for project participants”, version 1, 25/9/2014.

The report is starting with an introduction of HYDROUSA, revisiting the mission, the approach and the solutions provided, that are directly linked with our communication and dissemination efforts. All HYDROUSA activities (technical, non-technical, educational, research and prototyping, management and coordination) were contributing and constantly feeding with content our communication, through a community building approach.

As HYDROUSA is delivered by a consortium of 28 partners in 10 countries, the dissemination of the project is multiplied through all the member's communication channels and through a series of activities, including presentations in local and international conferences, workshops, trade-fairs, exhibitions, pitching events, press releases, articles and networking - stakeholders' events. HYDROUSA went beyond the regular practices, introducing a series of formats and methods that actively involved a multi-range of stakeholders creating a more water conscious and informed society, industry and policy.

We are proud of our collective results as we achieved an immense number of +632 reported dissemination activities, reaching more than 1,000,000 people.

**HYDROUSA has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 776643**

# 1. INTRODUCTION: INNOVATIVE, REGENERATIVE AND CIRCULAR WATER SOLUTIONS

## ABOUT HYDROUSA

Water management in Mediterranean regions is currently fragmented and there are several barriers, which need to be overcome in order to close water loops and contribute towards the environmental and economic development of these areas.

Mediterranean regions face significant challenges in terms of water management and conservation. Water reserves are scarce, while the high touristic activities during the summer months stress the limited water reserves.

To overcome these challenges, Horizon2020 project, HYDROUSA is creating innovative, nature-based and nature-inspired water management solutions for different types of non-conventional water sources, characterised by low energy footprint. The whole water value chain benefits from this innovative approach of turning a problem into a solution.

Clear water loops are demonstrated, recovering added value products, while integrating and interacting with the local society and market. HYDROUSA not only develops and demonstrates innovative water services, but revolutionises the water value chains in Mediterranean areas from water use up to sewage treatment and reuse.

HYDROUSA will change the human water cycle by valorising non-conventional water resources, which are currently not being exploited.

The project goes beyond the current water and wastewater management practices reimagining a water resilient economy, mitigating climate change and reforming the agro-food system (Figure 1.1).

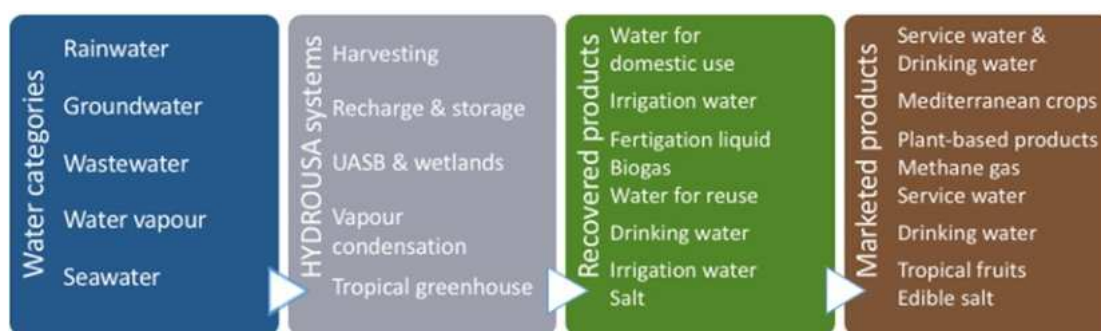

Figure 1.1 The HYDROUSA Practice

## HYDROUSA MISSION

HYDROUSA aims to create a community of 'water allies', which believes and works on shifting the development paradigm of our world from an open market society based on economic profits to a world where local communities are empowered to develop tailor-made solutions to improve their wellbeing, while regenerating the local environmental ecosystems. This gives the opportunity to local operators to develop economic, social and environmental services based on closed water loops where decentralised, low-tech systems are favoured.

## **HYDROUSA SOLUTIONS**

HYDROUSA solutions provide several services and integrated technologies which are based on traditional handcraft and traditional methods combined with modern nature-based solutions (NBS), ICT connection and automation systems. The proposed solutions show a perfect combination of building green infrastructures to make use of the plant-bearing benefits and generating green growth within an existing and demanding market while restoring ecosystems.

## **HYDROUSA COMMUNICATION APPROACH**

Hence, the HYDROUSA dissemination and communication activities are focusing on the engagement of a diverse range of stakeholders who constitute an active “community or water allies” disseminating the activities of the project and communicating its outcomes to a wide range of target audiences.

## 2. HYDROUSA: PROGRESS REPORT ON COMMUNICATION AND DISSEMINATION STRATEGY

### 2.1 Development of Dissemination and Communication Plan (T9.1)

#### 2.1.1 DCP Objectives

Starting in July 2018 (M1) Impact Hub Athens developed the backbone of a solid Communication and Dissemination Plan, delivering the following objectives:

- Create an overall and concrete dissemination and communication strategy for all partners
- Ensure that the vision, objectives, activities and results of the project become as widely known and understood as possible from a scientific, a technical and societal point of view
- Identify the Key Stakeholders and Target Audiences
- Form the key messages and taglines of our value proposition
- Analyse the respective communication means and the main Communication channels
- Create a map of Local and International Actors in private and public level
- Identify the community engagement and their involvement
- Specify quantitative indicators that will be used to evaluate how successful each dissemination/communication activity is
- Set and monitor the timeline of the execution of the comms and dissemination strategy for all partners

Six key elements (Figure 2.1) were taken into account to build our dissemination and communication strategy.

**Figure 2.1 HYDROUSA Dissemination and Communication Plan Structure**

### 2.1.2 Target Audience

When we identified the objectives of the Dissemination and Communication strategy, we implemented a thorough analysis of the potential stakeholders involved (Figure 2.2), customising the key messages and the “*tone of voice*”. The communication and dissemination activities have been designed in order to address these key target audiences and stakeholders, maximizing awareness of HYDROUSA objectives, the positive outreach and impact.

Figure 2.2 HYDROUSA Target Audience

### 2.1.3 Reporting Process

Reporting on dissemination activities (such as publications, presentations, articles etc.) is critical for the efficient monitoring of dissemination and communication activities, as activities are taking place from 28 partners located in 10+ different countries.

Reporting information include all relevant information - the name and the location of an event or a conference or a workshop, the number and type of the attending audience, the date of activity, the type of the presentation (print, online), the type of the media reached (TV, radio, print, online), the type of the publication (Scientific Journal, Conference Proceedings, Magazine) the type of audience (European Commission, Scientific community, Industry, Media, Business network, Strategic partners, Policy makers, Water authorities, Potential end-users, Investors, NGOs, General public, Local authorities, Civil society). In addition, reporting information on the publications contain the title of the publication, its authors, the title of the journal or conference proceedings or periodical or series to be published, the publisher, the place of publication, the relevant pages and date.

A google form has been developed (Figure 2.3) to report the dissemination activities to make sure that all the dissemination information is collected and recorded. This form was distributed quarterly and filled by the partners and was submitted to the DCM. During the first 24 months of the project, 219 entries have been submitted to the online form while by the end of program 632+ activities were totally reported. This means that on average approximately 10 activities took place every month.

(<https://docs.google.com/forms/d/e/1FAIpQLSeh2--Toliq84BPzgJYubAGcmrTCa5BQ0pVWKNHsLIWRhKaKA/viewform>).

Figure 2.3 HYDROUSA Reporting Activities Google Form

## 2.2 Branding Identity-Building a common narrative (T9.2)

The Brand Identity of HYDROUSA was already designed during the application and at the beginning of the program in 2018. In D9.2 we developed a branding toolkit along with HYDROUSA narrative that was validated among different target audiences and stakeholders to maximise the expected outputs according to the analysis of Task 9.1 - Dissemination and Communication Strategy. A unique identity was formed by communicating commonly a dynamic storyline of our mission and objectives (HYDROUSA Manifesto - Long and Short Version).

Our main slogans are:

**“We are on a mission! A community of Water Allies”**

**“Regenerative and nature-based water solutions”**

The project's logo (Figure 2.4) was developed during the proposal development phase and accompanied all the related project's material (presentations, leaflets, e-newsletters, project coordinator emails). During the first 6 months of the project, we developed a leaflet, a poster and a roll-up of the project, which are shown in Figure 2.5. This material has been extensively used by HYDROUSA partners in different events. Some illustrations are given in Figure 2.6.

**Figure 2.4 HYDROUSA Main Logo**

**Figure 2.5 HYDROUSA Poster and Roll-up**

**Figure 2.6 HYDROUSA Applications**

With a team of creatives, designers and visual communication experts and based on the colour code and the “look and feel” (Figure 2.7) of the initial material, the branding applications were designed both for physical and digital means, with the guidance of NTUA and ALCN.

**Figure 2.7 HYDROUSA suggested colours.**

During the development and the progress of HYDROUSA several more materials were created from physical and digital banners to new leaflets and folders, that could support the dissemination and communication of HYDROUSA objectives to the responsive audiences (Figure 2.8 & Figure 2.9).

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement No 776643

Figure 2.8 HYDROUSA Flyer I & II

Figure 2.9 HYDROUSA Banner

In parallel, the project's website was developed as the main communication platform to introduce the project and its progress, the project's news, the consortium and its innovative services ([www.hydrousa.org](http://www.hydrousa.org)).

The website has been updated with the project's activities, demonstration sites progress, news and events, demonstrating the development and the achievements of the project.

Since January 2019, we have had **43,089 page views** recorded on the website. 60.58% (in comparison to 53.5% at the middle-term review) of all the website sessions comes through organic search (Google), while social media is responsible for 8.2% of the total incoming traffic to the website.

The average time that a user spends in HYDROUSA website is 2 min and 21 seconds, while the average Sessions per User benchmark is around 1.4 min sessions per user (the top 20% of websites report 1.6 sessions per user, while the top 10% report 1.9 sessions per user. This is based on a 2022 report from Littledata surveying more than 6k websites), listing us as one of the most engaging and content active websites for users.

The website was created during October and December 2018 (M4-M6). With the support of MEMIRA, NTUA and AGENSO, the website and the architecture were designed with a user-friendly approach and according to target audiences that were outlined in the Dissemination and Communication Plan.

The content of the website was regularly updated by NTUA and IHA team, adding all the relevant information for the progress of the demo-sites, at the phase of construction, and the operating phase. Additionally interesting events, activities and exciting news were shared through the blog section of the website.

**The 3 most visited pages other than the homepage are:**

- The demo sites page (<https://www.hydrousa.org/demo-sites/>)
  - (8,471 page views June 2023 | 2,406 page views June 2020)
- The partners page (<https://www.hydrousa.org/partners/>)
  - (5,573 page views June 2023 | 1,926 page views June 2020)
- The about the project page (<https://www.hydrousa.org/about-the-project/>)
  - (5,388 page views June 2023 | 1,199 page views June 2020)

## 3. IMPLEMENTED ACTIVITIES

### 3.1 Communication activities (T9.3)

#### 3.1.1 Online social media

Before our official launch with the kick-off meeting of HYDROUSA in July 2018, the project was registered to all the social media platforms. By M24 we had achieved **450 posts** and **3,636 followers** | **+303%** above the total project goal - 1200 followers.

By M60 we have achieved more than **1.5 K posts** and more than **6.5K followers** | **+131%** above the total project goal - 1200 followers.

In detail:

**Table 3.1 Social media posts and followers**

#### 3.1.2 Mass media Communication

##### HYDROUSA Online and Offline Presence

HYDROUSA has been published in more than 145 offline and online channels; including.

- 146 press releases and media briefings – (including TV, radio, Video Shows, newspapers)
- Total estimated reach exceeds about 870,000 in 12 different countries and 3 continents.

##### Television - Radio

HYDROUSA has had important visibility on the TV since it has been presented on a variety of local, National and international media, such as the Greek Nationwide TV channels of ERT1 and ERT3 (Main public channels), ANT1 (Figure 3.1) on prime time and CNBC news (Figure 3.2) the American based TV network; also, on the local TV channels of Stonisi and Aeolos TV (Figure 3.3). The project has also capitalized from interviews given

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement No 776643

in Conferences and other events (Figure 3.4). Furthermore, HYDROUSA has been on the radio like Proto Programma in Greece the national wide state radio-station, on the Municipal Athens Radio 98.4 and on Skai 100.3 radio. Finally, HYDROUSA was presented at the Spanish Radio (<https://radiosabadell.fm/alicarta>).

### Some of the Highlights on Media Releases

[www.amna.gr](http://www.amna.gr)

In November 2018 HYDROUSA was launched with a full-page review on Athens-Macedonian News Agency (AMNA) (Figure 3.5). This is the largest joint media venture and distributor of content in Greece. The specific article was reposted-uploaded in more than 20 online media portals across Greece. Regular communication was established with journalists in AMNA who followed the developments of HYDROUSA.

#### Average page visits:

- Website monthly visitors: 200,000
- Estimated visit duration: 3.13 m

Figure 3.5 amna.gr mention

### [www.ekathimerini.com](http://www.ekathimerini.com)

At the beginning of the project in July 2018, HYDROUSA was presented in the international issue of kathimerini (Figure 3.6). Kathimerini is a daily newspaper published in Athens. The English edition is distributed separately in the [United States](#) and as a supplement to the international edition of [The New York Times](#) (formerly the [International Herald Tribune](#)) in [Greece](#) and [Cyprus](#), also available online. Simos Malamis as the CO (Project Coordinator) gave an interview for the vision and the solutions provided by HYDROUSA.

- Website monthly visitors: 1.027 m
- Estimated visit duration: 5.12 m

Figure 3.6 ekathimerini.com mention

### [www.vice.gr](http://www.vice.gr)

In March 2019, along with the Inauguration Event, HYDROUSA was presented in the Greek version of Vice (Figure 3.7). Vice is part of an American-Canadian digital media and broadcasting company targeting mainly youth and young adults. Amongst other, Vice features segments on global issues

- Website monthly visitors: 5,000
- Estimated visit duration: N/A

HYDROUSA was also launched in the online portal china.org.cn (Figure 3.8) targeting the Asian market with 32+ million followers online.

#### Project launched to improve water resource management on Greek islands

Xinhua, July 14, 2018

0 Comment(s) Print E-mail

Adjust font size:

ATHENS, July 14 (Xinhua) -- A consortium of 27 universities, technical companies and local authorities launched in Greece this week an innovative research project for the valorization of water resources.

Starting from three Greek islands, the project aims to promote novel usages for water quantities that would otherwise be discarded such as wastewater.

The HYDROUSA project, that is 83-percent funded by the European Union, will be applied on Tinos, Mykonos and Lesbos, equally splitting among them the six mini-schemes planned.

HYDROUSA's coordinators informed its stakeholders and the media at the Lavrio Technological and Cultural Park, south of Athens, about the details of the project that forms part of the EU's Horizon 2020 Research and Innovation Program.

It professes to go beyond the current water and wastewater management practices by adopting innovative, nature-based low-energy-footprint management solutions for different types of water such as wastewater, rainwater, groundwater, atmospheric vapor water and seawater.

The innovations employed will produce water suitable for different uses, including domestic and agricultural use and even drinking water, plus energy and value-added products to be marketed. For instance, on Tinos, the water produced will be partly used to irrigate tropical fruit plantations such as pineapple and papaya.

Figure 3.8 china.org.cn mention

[www.ekathimerini.com](http://www.ekathimerini.com)

When water prices went up, HYDROUSA came to give the answers to the problem. Simos Malamis from NTUA gave his insights to e-kathimerini (Figure 3.9).

## OECD report says price of water must reflect scarcity in Greece

### Newsroom

10.10.2020 • 16:17

Greece is facing a water scarcity and must adjust the commodity's prices to reflect that, the Organization for Economic Cooperation and Development (OECD) said in a report last week.

**Figure 3.9 ekathemirini mention**

## [Open Access Government](#)

A digital publication that provides an in-depth perspective on key public policy areas from all around the world including health and social care, research and innovation, technology, blockchain innovation, government, environment, and energy. Each quarterly edition features a wide range of prestige contributors, including government ministers, European commissioners, members of European Parliament, industry associations and charities. HYDROUSA innovative solutions were published in a 2-page article in the open access government targeting policy makers, public institutions and governments (Figure 3.10).

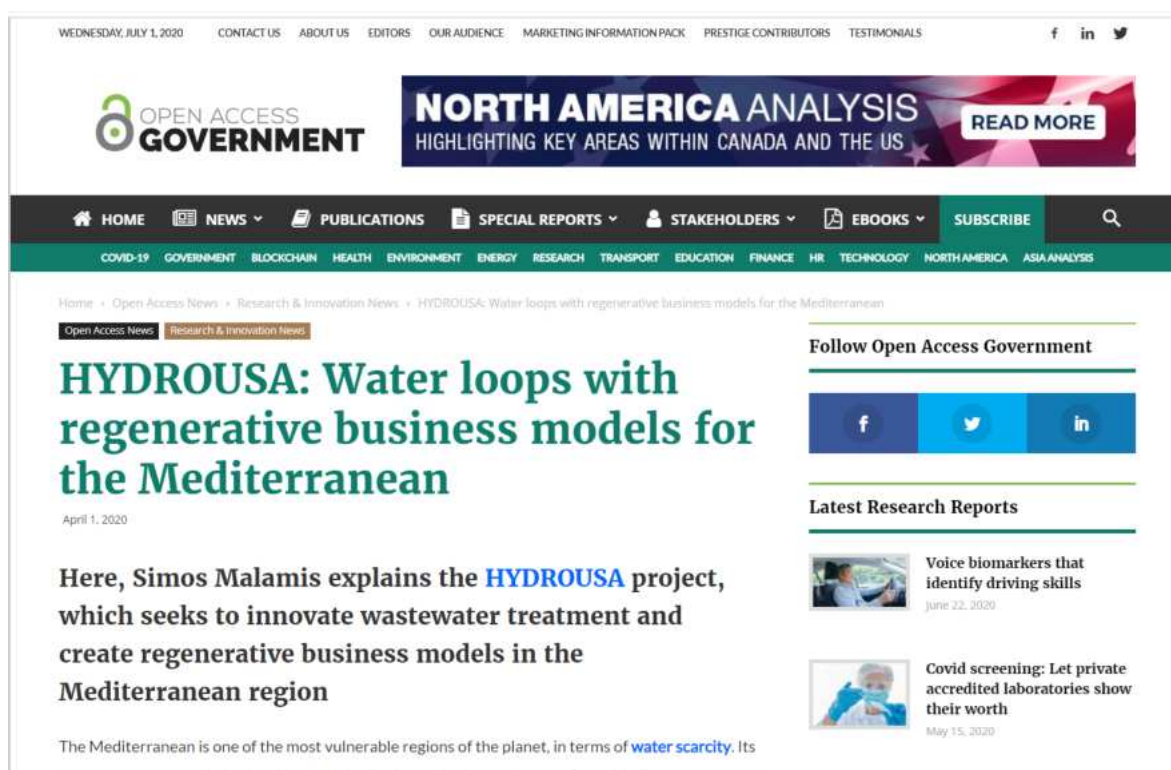

Figure 3.10 Open Access Government mention

## [atlasofthefuture.org](https://atlasofthefuture.org)

Even though they're surrounded by water, the Mediterranean islands face significant challenges: with dry zones, low precipitation, high touristic activity and wasted water resources. On many, water reserves have to be supplemented by water brought in by tankers. So HYDROUSA is here to give the answers (Figure 3.11).

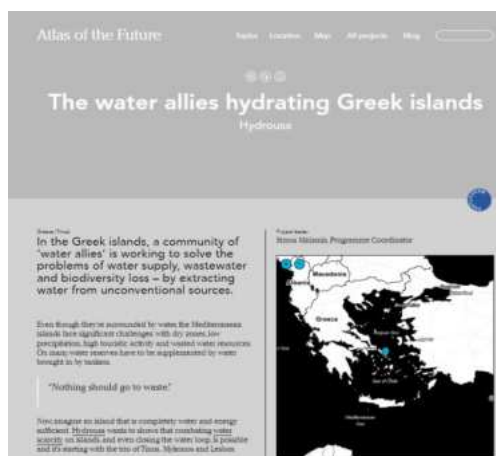

Figure 3.11 Atlas of the Future mention

### [Revolve.media](#)

HYDROUSA's pilot innovative technologies open up opportunities for replication & expansion on other cases & areas. Simos Malamis gives a thorough view on HYDROUSA project, as a paradigm of creating circular economy business models by reusing waters for agriculture, tourism & housing (Figure 3.12).

### 3.1.3 Printed and Online promotion Material

#### – Leaflets distribution

In July 2018 HYDROUSA's leaflet was designed by IHA and printed - distributed by NTUA during the kick-off meeting in Lavrio, Greece to all the consortium members. A new leaflet was designed (Figure 3.28) and distributed during various meetings and gatherings, focusing on the DEMO sites and the solutions they provide. HYDROUSA leaflet was available online, so that every partner could download and print high quality leaflets for every communication or dissemination activity that was realised. More than 4,500 leaflets have been distributed to events, conferences and meetings.

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement No 776643

**HYDRO 1**  
**CIRCULAR WASTEWATER MANAGEMENT**  
HYDRO 1 is a combined sewerage treatment plant with a constructed wetland (CWS) and a distribution to more than 100 m<sup>2</sup> of domestic water use of a village of 100 inhabitants. Water treatment and storage are managed and energy consumption is low. The system is designed to be a model for the treatment of water that is not 100% of CWS and wastewater plant producing high quality reclaimed water (Class A) that is used for irrigation purposes.

**HYDRO 2**  
**AGROFORESTRY SYSTEM**  
HYDRO 2 is a 1 ha of an agroforestry system that is managed using reclaimed water with high nutrient content resulting from HYDRO 1. It provides an innovative approach to cultivation and increases biodiversity, productivity and profitability. The agroforestry system uses more than 10 different species of trees, aromatic plants, bushes and medicinal herbs that are grown using reclaimed water.

**HYDRO 3**  
**SUBSURFACE RAINWATER HARVESTING**  
HYDRO 3 is a 100 m<sup>2</sup> subsurface rainwater harvesting system collecting rainwater into two cylindrical light structural storage tanks of 30 m<sup>3</sup> to 40 m<sup>3</sup> of capacity. Rainwater is collected and stored in the tanks during the wet season and is used during the dry season. The system is designed to be a model for the treatment of water that is not 100% of CWS and wastewater plant producing high quality reclaimed water (Class A) that is used for irrigation purposes.

**HYDRO 4**  
**RESIDENTIAL RAINWATER HARVESTING**  
HYDRO 4 is a residential water management system collecting and storing rainwater, stormwater and surface runoff from roofs and streets through a 100 m<sup>2</sup> subsurface rainwater harvesting system. The system is designed to be a model for the treatment of water that is not 100% of CWS and wastewater plant producing high quality reclaimed water (Class A) that is used for irrigation purposes.

**HYDRO 5**  
**BIOMIMETIC-BASED DESALINATION SYSTEM**  
HYDRO 5 is a solar-driven desalination system based on the principles of evaporation and condensation, inspired by the natural process of transpiration in plants. The system is designed to be a model for the treatment of water that is not 100% of CWS and wastewater plant producing high quality reclaimed water (Class A) that is used for irrigation purposes.

**HYDRO 6**  
**ECOSYSTEM WATERLOOPS**  
HYDRO 6 is a combined water management system collecting and storing rainwater, stormwater and surface runoff from roofs and streets through a 100 m<sup>2</sup> subsurface rainwater harvesting system. The system is designed to be a model for the treatment of water that is not 100% of CWS and wastewater plant producing high quality reclaimed water (Class A) that is used for irrigation purposes.

**ABOUT HYDROUSA**  
Title: Demonstration of water loops with innovative regenerative business models for the Mediterranean region.  
Acronym: HYDROUSA  
CER-2019-1017: Water in the context of the circular economy, innovation action.  
Total budget: €515,144.70  
EU contribution: €315,144.70  
Duration: 36 months  
Start date: 01/11/2019  
Number of partners: 10

**HYDROUSA**  
**REGENERATIVE & NATURE-BASED WATER SOLUTIONS**  
The project is a demonstration of water loops with innovative regenerative business models for the Mediterranean region. The project is designed to be a model for the treatment of water that is not 100% of CWS and wastewater plant producing high quality reclaimed water (Class A) that is used for irrigation purposes.

**HYDROUSA**  
**REGENERATIVE & NATURE-BASED WATER SOLUTIONS**  
The project is a demonstration of water loops with innovative regenerative business models for the Mediterranean region. The project is designed to be a model for the treatment of water that is not 100% of CWS and wastewater plant producing high quality reclaimed water (Class A) that is used for irrigation purposes.

**HYDRO 5**  
**Ag. Fokas Tinos**  
HYDRO 5 is a combination of nature-inspired low-cost desalination systems based on the principles of evaporation and condensation.

**3 elements in focus:**

- i) Mangrove Still System (MSS)**  
seawater desalination based on solar energy  
It produces clean water & salt  
This system irrigates the Production Greenhouse.
- ii) Saltwater Evaporation Greenhouse (SEG)**  
evapotranspiration and condensation processes with halophytes and mangrove plants  
This system supports the irrigation of the Production Greenhouse.
- iii) Production Greenhouse (PGH) for tropical crops**  
cultivation & production of around tropical plants [pineapple, passionfruit, banana, some dragonfruit and few papayas]

**ISSUES SOLVED**

- Produce sweet water from saltwater/brine
- Decrease import of tropical fruits
- Simultaneous production of salt

**Mangrove Still System (MSS)**

**Saltwater Evaporation Greenhouse (SEG)**

Figure 3.28 Leaflets

## – E-newsletter

In the initial stages of the project, the partners communicated the project through their own e-mail to their distribution list so that initial awareness is created. On the next stage, a dedicated e-newsletter was created (Figure 3.29) and distributed to contacts that had shown interest from HYDROUSA website. This first HYDROUSA e-newsletter consisted of 5 main parts:

- Intro - Project Explanation in a nutshell
- Description of the HYDROUSA demonstration sites, linking to the website that includes more information
- A featured story which was the animation video for the first dedicated HYDROUSA e-newsletter
- Highlights for each Island that demo sites take place (Lesvos, Tinos, Mykonos)
- Next steps coming up for the project

In total HYDROUSA has been communicated through e-newsletter to 36,000 recipients.

Figure 3.29 HYDROUSA e-newsletter I

This second HYDROUSA e-newsletter (Figure 3.30) consisted of exciting announcements, success, and progress stories, and was structured as follows:

- Intro - Project Explanation in a nutshell
- Save the date for HYDROUSA's closing conference WICC
- Exciting news, where HYDROUSA was awarded as a leading project for circularity (PRIMA WEFEE Nexus Award of the PRIME Foundation, Mediterranean Climate Change Adaptation Awards, Green Tech Award for Best European Project for the environment at the 2022 Verde-tec expo)
- Updates and highlights of the HYDROUSA demonstration sites, linking to the website for more information
- Participation to conferences and events
- Technology Videos and for me Impact Is, featured video
- Next steps coming up for the project

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement No 776643

### A community of Water Allies

HYDROUSA is an established EU-funded project implemented under the Horizon 2020 Research & Innovation programme aiming to recover water from non-conventional sources by capitalizing on the rational management of water resources.

We develop sustainable, innovative & nature-based solutions for water management in the Mediterranean region. Since the beginning of our project we have been working on the transition from a linear to a circular model, revolutionizing the water loops. Here is our concrete news.

### EXCITING NEWS

We are really proud of our achievement! HYDROUSA won the PRIMA WEFEX Award of the PRIMA Foundation. The Award was announced during the last day of WEFEX2022 Conference by the Director of DG Research and Innovation of the EC, Mr. John Bell.

Delighted to receive the first prize of the "Mediterranean Climate Change Adaptation Awards" under the Category Preservation of ecosystems and nature-based solutions among 55 applications.

HYDROUSA is deeply honored to receive the Green Tech Award for Best European Project for the environment at the 2022 Verde-tec expo.

### HYDROUSA DEMONSTRATION SITES | PROGRESS

[HYDRO1] A circular wastewater treatment system combining anaerobic processes with constructed wetlands (CWs) and absorption to treat domestic wastewater.

Newsflash: the HYDRO1 is fully operational treating more than 80 m<sup>3</sup> of the wastewater from the village of Andros, achieving more than 98% of COD and TSS removal.

### NEWS

We inspire, we connect, we share

HYDROUSA is present in a variety of scientific, environmental and sustainability related conferences, trade fairs exhibitions and seminars.

HYDROUSA was selected as one of the best case practice for the NEW European Bauhaus and has shared insights in events such as the Water Projects Europe Events on "Inclusive Governance for a Water-Smart Economy" (June 2021) and on "Nature-based solutions for water security and ecological quality in cities" (June 2022), "Sustainable Management of Natural resources" workshop in Shree Green, "Decentralized waste/wastewater management" stakeholders' meeting in Limassol, Cyprus, EU Green Week 2021 and 2022 Events, 9th International Conference on "Environmental Management, Engineering, Planning and Economics (EMEP)" in Mykonos, "MedWater" Forum in Malta, Circular Water Management event in Eschborn, 8th in Paris - 8th, Dubai, 2022, Impact Hub Global Gathering and "Reimagining" by IIT in Lisbon, Portugal, VI Athens Summit by OWR Advanced Facilities - Industry 4.0 - AP2022, the 4th Mediterranean Water Forum as part of EuroMedForum 2022 in Dakar and 4th International exhibition of Verde-tec in Athens.

### TECHNOLOGY SHORT FILMS

**HYDRO 5**  
A Seawater Desalination System based on the power of the sun

**HYDRO 6**  
Developing an autonomous unit in the nexus of Water | Energy | Food

**What is Water for You?**  
Our partners and our community is responding to this essential question for us all!

[HYDRO4] An eco-tourist lodge exhibiting self-sufficient and circular management of water, energy and food. The demo site has been fully operational since July 2020.

**We are local**

HYDROUSA has been demonstrated in several international media like CNBC, press, in national TV media like the Hellenic News Broadcast of 2021, 2022, 2023, the series of ERTFLUX 2020 Generation of 12, about the 17 SDGs, WOC, Greece and local news press (also see) for HYDRO 1 & 2.

We would like to thank all our media partners and collaborators for supporting our efforts for the dissemination of HYDROUSA.

Figure 3.30 HYDROUSA e-newsletter II

This third HYDROUSA e-newsletter (Figure 3.31) was a dedicated invitation with the key information on the final conference (i.e., Water innovation and Circularity Conference – WICC), international meeting of water experts. The newsletter was inviting scientists, researchers and organisation's representatives to submit their abstracts and posters so that they could present their contributions during the final conference in June 2023.

Figure 3.31 HYDROUSA e-newsletter III

This fourth HYDROUSA e-newsletter was dedicated to solution providers who work around the topics of circularity, nature-based solutions - nature resource conservation and NetZeroFuture to submit their innovative ideas and express interest for the HACKATHON of HYDROUSA. The invitation was targeting entrepreneurs, researchers, students or established startups that could be inspired by the findings of HYDROUSA and develop complementary or spin-off sustainable technologies and solutions (Figure 3.32).

Figure 3.32 HYDROUSA e-newsletter IV

### 3.1.4 Animation Video

**HYDROUSA Animation Video:** <https://www.youtube.com/watch?v=yDXS7X7Z-Po> (Figure 3.33). The script was developed during M7 after the submission of *D9.1: Dissemination and Communication Plan* and *D9.2: Branding Identity* by IHA with the support of NTUA. The storyboard (Figure 3.34) was developed by IHA in partnership with Anima Syros (the biggest institution for Animation Arts in Greece) with animated characters describing the vision, the scope, the key innovations, and the demonstration activities planned for each island. The video was uploaded on our platforms in June 2019 (M12) and was presented to the consortium during the 3<sup>rd</sup> Management meeting in Barcelona. On M24 we had achieved **1,382 views** in the HYDROUSA YouTube channel **extending our total goal by 230%**. Furthermore, the HYDROUSA animation video has been viewed through the Twitter, LinkedIn and Facebook platforms having more than 4,000 views in total. On M60 we had **2,907 views** only in the HYDROUSA YouTube channel, extending our goal by **485%**. Furthermore, the HYDROUSA animation video has been viewed through the Twitter, LinkedIn and Facebook platforms having more than **12,000 views in total**.

**Figure 3.33 Animation Video**

**Figure 3.34 Animation Video Storyboard**

### 3.1.5 Communication Actions in Conferences, Events and Workshops (including presentation in Academic-Scientific Conferences, stakeholders' meetings, trade fairs, Workshops, Seminars)

HYDROUSA was presented in:

As of the first reporting period (M1-M24) 105 events targeting scientific audience, researchers, investors and policy makers (54 Participations in Conferences, 34 Participations in Workshops, 17 Participations to Events other than a conference or a workshop). The distribution was 21% National and 79% International events, taking place around the globe.

In total by M60 the total activities related to the content of HYDROUSA were 420, including Participation in Conferences [Joint events with other EU projects, Academics, Scientific, Public Conferences] - 185, Participation in Workshops - 136 [Seminars, Workshops], Participations to Events other than a conference or a workshop - 99 [Trade Fairs, Exhibitions, Stakeholders Meetings, Pitching events].

Some of the key findings:

**Wide Geographic Reach:** The activities of the project were widespread, covering numerous countries across different continents, including Europe, Asia, Africa, and the Americas. This global reach highlights the consortium's commitment to address water-related challenges with local prototypes but with an international possibility for scaling (revisit those results in WP7 Exploitation).

There 45 countries that HYDROUSA was present as listed below in Table 3.2:

**Table 3.2 List of countries in which the HYDROUSA project was disseminated.**

1	Argentina	16	France	31	Portugal
2	Austria	17	Germany	32	Russia
3	Australia	18	Greece	33	Senegal
4	Belgium	19	India	34	Serbia
5	Bangladesh	20	Israel	35	Slovakia
6	Bosnia and Herzegovina	21	Italy	36	Slovenia
7	Bulgaria	22	Japan	37	South Africa
8	Chile	23	Kazakhstan	38	Spain
9	China	24	Malaysia	39	Taiwan
10	Colombia	25	Malta	40	The Netherlands
11	Croatia	26	Mexico	41	Tunisia
12	Cuba	27	Oman	42	Turkey
13	Cyprus	28	Palestine	43	UAE
14	Denmark	29	Peru	44	UK
15	Egypt	30	Poland	45	USA

**Collaboration and Networking:** The realised activities ensure the involvement of various stakeholders from cities, universities, research institutions, and governmental bodies indicating that HYDROUSA has established rooted partnerships and collaborations that can lead to the sustainability and resiliency of the results. Building a strong network around HYDROUSA “the community of water allies” was crucial for promoting circular water management practices and knowledge exchange.

**Emphasis on Online Engagement:** The significant number of online activities, especially during the COVID-19 pandemic, reflects HYDROUSA’s adaptability giving us the chance to promote further our results and efforts. We had to transition a lot of our communication efforts to virtual formats due to restrictions that we managed to exploit in order to increase our participation and outreach. Approximately 70 activities took place online other than the press releases and the Media briefings.

**Collaboration Beyond Europe:** HYDROUSA participation in conferences and formats across the globe, in countries like India, Argentina, Japan, China, South Africa, Malaysia gave us the opportunity to get a global outreach, while validating our assumptions on the urge of decentralised circular solutions starting from the Mediterranean and being a pioneer beyond Europe to address water challenges on a global scale.

- **13 Pitching Events**, locally and internationally some examples:
  - Green Tech Symposium Athens-Greece

- Ecomondo- Water reuse in agriculture, sustainable irrigation and nature managed water cycle in the new European framework, Rimini-Italy
- EAWAG - The Digital Transformation of the Water Sector: from Data to Circular Smart Water Systems - Switzerland - UNBRUN)

● **28 Trade Fairs**, targeting Business networks, Industry Experts and Investors including:

- Ecomondo in Rimini, Italy within the framework of the 3<sup>rd</sup> European Nutrient Event and within the workshop of European research and innovation for the implementation of circular economy and bioeconomy (8-9 November 2018 & 10 November 2022)
- Verdetec in Athens, Greece (15-17 February 2019) where HYDROUSA organized together with the Hellenic Water Association a workshop on water resources management.
- the Aquatech in Netherlands (5-8 November 2019)
- UfM Women Business Forum - Towards a Circular Economy -Barcelona, Spain (19 November 2019)
- Dubai Expo G-Stic - Local solutions for water and climate challenges in the Mediterranean region - UAE (24 October 2021)
- IFAT (trade fair on Water, Sewage, Waste and Raw Materials Management) - Clusters as a key players in the promotion of circular economy and digital solutions in Catalonia (6 January 2022)
- Forward Green Expo- 1st International circular Economy expo Thessaloniki (8-10 June 2023)

**Figure 3.35 Mix of Stakeholder Groups Reach**

## Country

Figure 3.36 International Conference Presentations

Some of the outstanding events where HYDROUSA was disseminated are the following:

### EXPOAGUA PERU, 17-19 October 2018, Lima

Expoagua PERU, the most important trade fair of the water sector in Perú, was held in Lima from 17 to 19 October 2018 (Figure 3.37). The trade fair counted with an exhibition area and three conference rooms and with a total number of visitors over 3500. The CWP gave a presentation about *“Circular Economy as a strategic axe to promote the competitiveness of the water sector entities”*. Sara Gabarron, project Manager of the CWP, introduced some general trends about Circular Economy models and had the opportunity to present the HYDROUSA project to the audience.

**Figure 3.37 HYDROUSA at EXPOAGUA PERU 2018**

### ECOMONDO, Rimini, 2018, 2021 and 2022

HYDROUSA was presented by its coordinator at the 3<sup>rd</sup> European Nutrient Event: Towards Circular Economy of Phosphorus and other nutrients, in Rimini, Italy, on 5-9<sup>th</sup> November 2018. On October 2021, experts from the HYDROUSA team presented the circular economy approach of HYDROs 1-6, invited to the event WATER PROJECTS EUROPE – Water-smart industrial and utility-industry symbiosis within the Ecomondo exhibition in Rimini, Italy (Figure 3.38). In 2022, the HYDROUSA team had the opportunity to participate in Ecomondo exhibition and providing tangible results on decentralised water reuse! In 2022 the co-organised by NTUA workshop was titled: Water Project Europe – Challenges and eco-innovation actions addressing water scarcity and drought in Mediterranean countries (Figure 3.39). The degree of water scarcity and its political, economic and social implications are felt much more severely in regions like the Mediterranean, where climate change is coming at a very high pace. In the last 50 years, the total water demand has doubled as a result of demographic pressure and from the development of water-intensive activities, such as tourism and manufacturing. Water quantity and quality challenges together with proper strategies for integrated water management, considering irrigation, energy production, and domestic and industrial use, need to be properly addressed. International collaboration and innovation actions are preferable mechanisms to tackle these challenges from a technical and socio-economic point of view. In addition, during ECOMONDO 2022 HYDROUSA was hosted at the booth of the European Union together with other EU-funded projects, presenting the circular solutions of the project as well as some of the derived products (Figure 3.40).

**Figure 3.38 HYDROUSA at ECOMONDO 2021**

**Figure 3.39 Photos from the workshop organized at ECOMONDO 2022**

**Figure 3.40 HYDROUSA's booth at ECOMONDO 2022 and event in Mexico ECOMONDO 2022**

### Large-scale events with the public, 2018, 2019, 2022, Athens, Ancona

HYDROUSA participated in three large-scale events, having great visibility to 10,000+ people from the scientific community and specific audiences like young students and researchers (e.g., Athens Science festival 2019, Researchers Night Athens, Sharper Ancona Italy, European Researcher Night (Figure 3.41)). In both 2018 (Figure 3.42) and 2022 (Figure 3.43), HYDROUSA was presented at the Sanitary Engineering Laboratory (SEL) booth during Researcher's Night in Athens in 2018 and 2022. Students of different educational levels and representatives of the academic community were informed about HYDROUSA's solutions, but also saw the derived products (essential oils, lavender, oregano and other goods).

**Figure 3.41 Athens Science festival 2019**

**Figure 3.42 NTUA Researchers' Night 2018**

**Figure 3.43 NTUA Researchers' Night 2022**

#### Ellen McArthur Foundation, 7 May 2019, Barcelona

HYDROUSA project was also presented in the Ellen McArthur Circular Economy Acceleration workshop held on 7<sup>th</sup> May 2019 in Barcelona, Spain. The project received significant interest and the opportunity to promote HYDROUSA concept within the CE100 network has been discussed (Figure 3.44).

Figure 3.44: HYDROUSA at Ellen McArthur Circular Economy Acceleration workshop Spain 2019

### 3<sup>rd</sup> IWA resource recovery conference, 8-12 September 2019, Venice

The HYDROUSA project was presented at the 3<sup>rd</sup> IWA RRC, which took place in Venice, Italy, from 8 to 12 September 2019. The conference was organised by the Polytechnic University of Marche, the University of Queensland, the University of Verona and the EU-HORIZON2020 SMART-PLANT consortium and covered a wide range of topics including resource recovery, wastewater treatment and sanitation infrastructure - global, regional and local perspectives (Figure 3.45).

Figure 3.45 HYDROUSA at 3<sup>rd</sup> IWA Resource Recovery Conference

### Aquatech Water event: Amsterdam, October 2019, Netherlands

The Aquatech in Amsterdam is the world's leading water trade show for process, drinking and wastewater visited by over 20,000 water professionals. HYDROUSA was presented at the booth of ICT4Water cluster throughout the event, and even had a possibility to pitch the solutions developed (Figure 3.46).

**Figure 3.46 HYDROUSA at Aquatec trade fair 2019**

### **COP25, 2-13 December 2019, Madrid**

The Catalan Water Partnership (CWP) participated in the 25<sup>th</sup> edition of the World Climate Summit COP25, which took place from 2<sup>nd</sup>-13<sup>th</sup> December 2019 in the IFEMA fairgrounds in Madrid. The World Climate Summit COP25 is organized by the United Nations and it is one of the most important global events about climate change. The CWP participated in the Green Zone panel discussion to discuss the industrial ecosystems, cluster roles and innovation. In this session, Xavier Amores, cluster manager of the CWP, made a presentation focusing on circular economy in the water sector, highlighting the HYDROUSA project (Figure 3.47).

**Figure 3.47 HYDROUSA at the COP25 in Madrid**

### **Towards a Circular Economy Model for the Water Cycle, 9 July 2020, online**

The HYDROUSA project hosted a webinar organised by project partners CWP and ICRA (Figure 3.48). The webinar was exploring further HYDROUSA's practices and vision as well as give the scientific participants a chance to meet the partners behind the project. The main body of the webinar was highlighting the global challenge, where water resources have been facing considerable challenges due to water availability and management, climate change impacts and the deterioration of ecosystems. One way to manage water

sustainably is to close water loops especially in regions with scarce water resources such as the Mediterranean region. On a second level the partners presented the approach proposed by HYDROUSA project of closing water loops, developing new circular business models suitable for the Mediterranean region as well as other water-scarce regions in Europe and worldwide. The webinar encouraged more regions and entities to adopt respective practices.

# HYDROUSA PROJECT

9th July

## Visit of the Head of the EU Delegation to Egypt to SEKEM, April 2021, Cairo

Our partner Heliopolis university, invited the Ambassador Christian Berger, Head of the EU Delegation to Egypt, and he kindly accepted the invitation to visit Heliopolis University and SEKEM to learn more about its dynamics and beliefs. The ambassador Visited on April 2021 the SEKEM farm and checked different water-loops inspired by the HYDROUSA project. Then the delagation headed back to Cairo with Helmy Aboueish, Chair of Board of Trustees to visit Heliopolis University for Sustainable Development. There he learned about the university's system and checked different cent of excellence and their ongoing projects. And accepted the University's shield and wrote a message in the HU Memorial book (Figure 3.49).

**Figure 3.49 Visit of the Ambassador Christian Berger, Head of the EU Delegation to Egypt to SEKEM**

### Expo G-Stic, 26 October 2021, Dubai

HYDROUSA experience on decentralised water management was presented at Dubai Expo by the Coordinator of the project, explaining how nature-inspired innovations help closing the loops on three Greek islands (Figure 3.50).

**Figure 3.50 HYDROUSA at Dubai Expo G-Stic in 2021**

In 2021, almost all international conferences were held online due to the COVID -19 pandemic. The HYDROUSA project was presented by many partners such as NTUA, UNIVPM, UBRUN, IRIDRA, ICRA, CWP, SEMIDE, RADKE, PLENUM and others in a considerable number of important conferences such as EcoSTP, CEST2021 and the 4<sup>th</sup> IWA RRC, which can be seen in Figure 3.51.

**Figure 3.51 Some of the conferences that HYDROUSA solutions presented in 2021**

### HYDROUSA Webinar Series in Greek Islands Including #EU Green Week, online, May 2021

Our dissemination partner IHA organized three series of webinars, one targeted for each of the demonstration islands of Tinos, Mykonos and Lesbos. HYDROUSA 2021 webinar series were designed by a community of water allies to introduce the mission towards a viable scenario of a circular economy. We address the challenges of water supply, wastewater and biodiversity loss – by extracting water from unconventional sources utilising state-of-the-art and nature based technological innovations. The deep dive webinars brought together the project's partners, academics, engineers and interested stakeholders from the local community of the destinations. The webinars included an introduction to the project's mission, a discussion on the water challenges faced on each destination and the explanation of the innovative applications by the professionals in charge of the distinct technologies.

The first webinar revolved around HYDROUSA applications of the island of Mykonos, where a residential rainwater harvesting [HYDRO4] and a subsurface rainwater harvesting system [HYDRO3] are installed. The second webinar revolved around HYDROUSA applications on the island of Tinos, where two distinct applications are implemented: low-cost desalination systems adhering to the values of evaporation & condensation, mimicking the natural processes of the Mangrove tree for the harvesting of a tropical Greenhouse and the production of edible salt [HYDRO5] and a combination of circular applications closing water loops in an eco-tourist unit [HYDRO6]. The last webinar was integrated as part of the EU Green Week and revolved around HYDROUSA applications of the island of Lesbos, following a completely circular solution for wastewater management in the Antissa village in Lesbos Island.

The webinars' agenda involved an informative quiz on each island's environmental condition, space for discussion and questions and a teaser for the project's next steps and potential transferability cases. Within these webinars, the speakers included academic organizations, municipalities, water utilities, hotel business, NGOs and SMEs (Figure 3.52).

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement No 776643

## HYDROUSA

a circular economy paradigm

*"Exploring a completely circular system on Lesvos"*

**6th of May 2021 |  
10.30 - 12.00 EET (+2 GMT)**

**#EUGreenWeek  
2021 PARTNER EVENT**

### Introduction to HYDROUSA: A circular economy paradigm A WEBINAR SERIES

HYDROUSA 2021 webinar series are designed by a community of water allies to introduce the mission towards a viable future for each destination.

We attempt to solve the problems of water supply, wastewater and biodiversity loss - by extracting water from unconventional sources utilising state-of-the-art technological innovations.

#### WHO

Each webinar is designed to engage & enlighten important actors of HYDROUSA project pilot applications & their implications for the future of the destination. **Stakeholders from Decentralised Municipalities, Households, Water Authorities, Hospitality & Food services, Ecotourism facilities & alternative farms are invited to join us through the online series!**

#### WEBINAR III

##### HYDROUSA works on Lesvos

*"Exploring the circular applications on Lesvos"*

**6th of May 2021 - 10.30 - 12.00 EET (+2 GMT)**

This webinar revolves around HYDROUSA applications on the island of Lesvos where two interconnected systems are implemented: In the village of Antissa, a Wastewater Treatment system and an Agroforestry system are installed in collaboration with the Municipality of Western Lesvos, the Water Utility of Lesvos & the University of the Aegean.

#### AGENDA

**HYDROUSA: a circular economy paradigm**  
Moderation: *Dimitris Kokkinakis*, Impact Hub Athens

**Introduction to HYDROUSA**  
**Vision (Why?), Approach (How?), Actions (What?)**  
Speaker: *Dr Simos Malamis*, National Technical University of Athens

**Introduction to the Island of Lesvos**  
Speaker: *Despoina Bokou*, Water Utility of Lesvos

**HYDROUSA applications in Lesvos**  
**Discussion in Pecha Kucha style** around challenges, solutions, the work progress and its outputs so far

**HYDRO 1 - Wastewater Treatment system**  
Speaker: *Evangelos Stathiris*, National Technical University of Athens

**HYDRO 2 - Agroforestry system**  
Speaker: *Omar Eldahan*, Heliopolis University

**Closing remarks**  
What's still missing? What is coming up for HYDROUSA?

**Figure 3.52 Agenda and photos from the HYDROUSA Webinar Series in Greek Islands**

### Rethinking Water Event, Lisbon, 2 December 2021

The Rethinking Water event gathered researchers, innovators, entrepreneurs, experts and policy makers with a genuine interest in water-related issues to discuss the most pressing challenges in Europe. The Coordinator of the HYDROUSA project, Dr Simos Malamis, participated in the event and presented the Greek situation regarding water reuse and the HYDROUSA project as a tangible example of the valorisation of non-conventional water resources (Figure 3.53). The Rethinking Water event took place in the framework of the second Water Reuse Day, held in Lisbon on 2 December 2021, as the result of the collaboration of the EIT Water Scarcity and the FIT4REUSE project.

**Figure 3.53 Rethinking Water Event 2021 Round Table**

### Presentation to TEDx Vasto, 4 December 2021

HYDROUSA was presented in a TEDx presentation made by Francesco Fatone from UNIVPM. Addressed to the general public, the event was held in Vasto (South Italy) on the 4<sup>th</sup> of December 2021. The main topic was sustainability and decarbonization. The people in presence were more than 100, while YouTube video has > 800 visualizations. Presentation was made by Francesco Fatone from the UNIVPM (Figure 3.54).

**Figure 3.54 HYDROUSA presented at the TEDx presentation addressed to the general public**

#### Verde.tec Trade fair, March 2022, Athens

Verde. tec is one of the most important environmental technology events in Greece. It covers a wide range of topics on energy, circular economy and smart cities. On March 2022, HYDROUSA participated in Verde.tec trade fair at the booth of the Sanitary Engineering Laboratory (SEL) of the NTUA. The visitors had the opportunity to learn about HYDROUSA's solutions and also to have a close look at some of the derived products (oregano, lavender, aronia liqueurs, etc.) (see Figure 3.55)

**Figure 3.55 HYDROUSA at Verde.tec trade fair.**

#### World Water Forum Dakar, Senegal, 21-26 March 2022

The World Water Forum is the world's biggest water-related event, held every three years to bring together key political actors, business leaders, NGOs, donors, and international organizations to promote dialogue and facilitate access to water and sanitation. The 2022 Forum—under the theme, *Water Security for Peace and Development*—is jointly organized by the World Water Council (WWC) and the Government of Senegal and has been the first hosted in Sub-Saharan Africa. The Forum provided a unique platform for the water community and key decision makers to collaborate and make long-term progress on global water challenges. The 9th World Water Forum focused on four priorities: 1) water security and sanitation; 2) cooperation; 3) water for rural development; 4) means and tools for implementation of reforms in water and sanitation. Additionally, the Forum convened a Summit of Heads of States and major international institutions, to advance the political agenda on water and sanitation at the midpoint of the 2030 agenda on implementing the water

and sanitation targets and Sustainable Development Goals (SDGs). The HYDROUSA project was presented during the “Mediterranean Solutions from the 4<sup>th</sup> Mediterranean Water Forum” session during the Water Forum” (Figure 3.56). We showed the regenerative, circular and nature-based dimensions of the project.

**Figure 3.56 HYDROUSA at World Water Forum**

### New European Bauhaus, Brussels, 9-12 June 2022

The New European Bauhaus (NEB) is an environmental, economic, and cultural initiative that combines design, sustainability, accessibility, affordability and investment to make the European Green Deal a reality in Europe. The HYDROUSA project was part of the New European Bauhaus Festival which took place on 9-12 June 2022, as one of the best-case practices of Horizon2020. The NEB Festival which took place in Brussels, was a great opportunity to bring citizens together to discover the New European Bauhaus values of beauty, sustainability and togetherness, and their power to address societal challenges. The participants of the festival were from pluri-disciplinary backgrounds — from science to art, design to politics, architecture to technology. HYDROUSA participated at the NEB Festival to demonstrate the value of innovative, regenerative and circular solutions for nature-based water management of Mediterranean coastal areas, closing water loops, nutrient management, boosting the agricultural and energy profile and local economies based on circular value chains (Figure 3.57). During the FESTIVAL representatives of the consortium NTUA & IHA, were hosting an info stand, giving information about the project and hosting and interactive vlog on the question “For me water is...”.

**Figure 3.57 HYDROUSA presentation EU BAUHAUS**

#### **EIT Climate-KIC workshop on Circular Economy, Online, 19 July 2022**

HYDROUSA project was presented by Fabio Masi (IRIDRA), Francesco Fatone and Josue Gonzalez (UNIVPM) at an online seminar entitled “Circular Economy” organized by EIT Climate-KIC. The EIT Climate-KIC is a Knowledge and Innovation Community (KIC), which aims to accelerate the transition to a zero-carbon, climate-resilient society that helps mitigate and adapt to climate change (Figure 3.58).

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement No 776643

#### IWA World Water Congress & Exhibition, Copenhagen, 15-19 September 2022

The HYDROUSA had a strong presence at the IWA World Water Congress in Copenhagen through our partners NTUA, UoA, ICRA and IRIDRA (Figure 3.59). Specifically, HYDROUSA was disseminated through three platform presentations, one pitch and two posters. HYDROUSA participated in the IWA World Water Congress & Exhibition – a global event for water professionals covering the full water cycle. The World Water Congress & Exhibition is designed to bring together water professionals and also engage the water-consuming industry, agriculture, architects and urban planners, hydrologists and soil and groundwater experts, social sciences, ICT-sector, the financial sector and others. HYDROUSA presented to a global audience it’s vision, outcomes, achievements as well as the upcoming activities and conferences.

**Figure 3.59 HYDROUSA at IWA WWCE 2022**

### **AGROTICA Trade fair, Thessaloniki, 20-23 October 2022**

The AGROTICA trade fair is the most central networking point for the agricultural sector and the agricultural economy of Greece. HYDROUSA's solutions were presented at the AGROTICA trade fair at the booth of the project partner AGENSO. In particular, the low-cost irrigation automation system was presented, which calculates the ideal amount of irrigation water based on crop needs (Figure 3.60).

Figure 3.60 HYDROUSA at AGROTICA trade fair

### 13<sup>th</sup> International Conference on Water Reclamation and Reuse, 15-19 January 2023, Chennai, India

Fabio Masi from IRIDRA presented the HYDROUSA project at the 13<sup>th</sup> International Conference on Water Reclamation and Reuse, held in Chennai, India, from 15 to 19 January 2023. The HYDROUSA team was selected to present to the audience the results and outcomes of the HYDRO1 and HYDRO2 demonstration sites in Lesvos (Figure 3.61).

Figure 3.61 HYDROUSA at IWA Reuse Conference

### Liaison Workshop with HOUSEFUL project, 17 January 2023, Barcelona

Óscar Prado presents the UASB technology developed in HYDROUSA in the VI Water Talks meeting in Terrasa (Barcelona), organized by LEITAT and the CWP within the framework of the HOUSEFUL project (Figure 3.62).

**Figure 3.62 HYDROUSA presented at the VI Water Talks meeting in Terrasa**

#### International Conference SABER UH 2023, June 2023, Havana

Óscar Prado from AERIS presented HYDROUSA in Havana, Cuba, in the International Conference SABER UH 2023 ([https://convencion.uh.cu/en\\_EN/](https://convencion.uh.cu/en_EN/)), organized by the University of Havana. Representatives of governments, scientific community and other relevant stakeholders were present (Figure 3.63).

**Figure 3.63 HYDROUSA presented at the International Conference SABER UH 2023 in Cuba**

#### IWA Conference on Wetland Systems for Water Pollution Control (ICWS), 6-10 November 2022, Lyon

The HYDROUSA team had a strong presence at the 17<sup>th</sup> International Conference on Wetland Systems for Water Pollution Control (ICWS) held in Lyon, France, from 6 to 10 November 2022 (Figure 3.64). In particular, Water Europe, together with HYDROUSA and INRAE/INSA, organised a workshop entitled "The role of Wetlands and other Nature-Based Solutions in tackling Water Scarcity in the Circular Economy era", where the project coordinator presented the HYDROUSA project. In addition, the HYDROUSA team participated in the ICWS conference with three oral presentations, two by NTUA and one by IRIDRA, presenting the results of the HYDRO1 demo site.

**Figure 3.64 HYDROUSA presented at the IWA Conference on Wetland Systems for Water Pollution Control**

#### Workshop organized by the SMILO network, 22-23 November 2022, Saint-Honorat

HYDROUSA actively participated at the international “*Small islands sanitation: Solutions and good practices*” held in 22-23 November 2022 in Saint-Honorat (France). SEMIDE and IRIDRA presented HYDROUSA demo sites in Lesbos, Mykonos and Tinos to share feedback and good practices. The event gathered the French-speaking island managers of the SMILO network, the network’s a group of Sanitation experts as well as the partners of Saint-Honorat (Figure 3.65).

**Figure 3.65: HYDROUSA at the International workshop “Small islands sanitation: Solutions and good practices in Saint-Honorat, France**

#### HYDROUSA at the Italian Republic Senate, 11 May 2023, Rome

On the 11<sup>th</sup> of May 2023 during the hearing regarding the national special legislation to face water scarcity which took place both on online and in person, Francesco Fatone presented HYDROUSA to the Italian Republic Senate as an exemplary case study to tackle water scarcity in rural areas (Figure 3.66).

**Ruolo ed esperienza personale, referenze a base di questa presentazione**

**Figure 3.66 Francesco Fatone from UNIVPM presenting HYDROUSA at the Italian Republic Senate**

#### EcoSTP, 26-29 June 2023, Girona

EoSTP-23 aimed to discuss the latest cutting-edge ecological technologies for a sustainable transition to wastewater treatment, reuse and resource recovery on an urban and industrial scale, with a special focus on

effective knowledge transfer into practise. HYDROUSA participated in the ecoSTP-23 conference held in Girona, Spain, from 26 to 29 June 2023. In particular, a workshop entitled "Water reuse and resource recovery at decentralized level in MED area" was co-organised by HYDROUSA's partners. In Figure 3.67, the coordinator presented the HYDROUSA project, while the solutions of the project were presented from different perspectives by ICRA, CWP, UBRUN, UNIVPM and IRIDRA. In addition, HYDROUSA participated in the conference with 6 posters from ICRA and an oral presentation from NTUA (Figure 3.67).

**Figure 3.67 HYDROUSA at ecoSTP2023**

### 3.1.6 Publications

Targeting also the academic community we have 17 peer-reviewed scientific publications in journals (Table 3.3) during the lifetime of the project. HYDROUSA has contributed significantly to the academic and scientific

community with a total of 17 publications from October 2019 to June 2023, collectively reaching an estimated audience of over 5,000 individuals and representatives from the academic community, organizations and institutions. According to the GA KPIs, HYDROUSA was expected to deliver 15 publications. However, due to the increased interest and recognition within the scientific and academic community, we exceeded our target by 25% with the active contribution of the respective partners.

These publications span a diverse range of research fields, including circular economy assessment, nature-based solutions, water resource management, urban design and planning, wastewater treatment, and sustainable agriculture. The vast majority of the publications has been realized in top Journals: 3 papers in Water Research, (Impact Factor = 12.8), 3 papers in the Science of the Total Environment (Impact Factor = 10.754), 2 papers in the Journal of Cleaner Production (Impact Factor = 11.072), 1 paper in Renewable energy (Impact Factor = 8.634), 1 paper in the Journal of Environmental Chemical Engineering (Impact Factor = 7.7),

These valuable publications serve as an essential knowledge resource for academics, researchers, policy makers, and various stakeholders, providing insights and innovative approaches to address pressing environmental and water-related challenges. Scientific publications play a significant role in informing and inspiring further research, fostering a collaborative and informed ecosystem where evidence-based decision-making and sustainable practices can flourish. These publications underscore the crucial importance of scientific research in guiding policy development, advancing sustainability efforts, and ultimately shaping a more resilient and environmentally conscious future.

**The majority of the project's research results have not been published yet. The project has produced a lot of interesting, start-of-the-art research which is currently unpublished. We expect that in total more than 40 publications of HYDROUSA project will be realized over the years to come.**

**Table 3.3 Scientific publications**

In conclusion for T9.3, the HYDROUSA project's commitment to communication and dissemination has yielded remarkable results, transcending the boundaries of conventional outreach. With an estimated number of over 1,000,000 individuals reached across a spectrum of activities, HYDROUSA has laid a robust foundation for the future. This extensive reach signifies the project's remarkable impact but also sets the stage for heightened engagement with partners, the cultivation of new client relationships, and the potential for knowledge transfer to future sites.

As HYDROUSA continues to pioneer circular water management practices and inspire global action, its impressive outreach results stand as a testament to the project's dedication to shaping a more sustainable and resilient water future.

## 4. DISSEMINATION ACTIVITIES (T9.4)

### 4.1 Opening Phase

The inauguration event of HYDROUSA (Figure 4.1) was launched in M9 with high participation of stakeholders and decision makers - overachieving the targets for participation (143 participants). Local and international media, academics, activists, entrepreneurs, students, institution representatives, other Water related projects and organisations participated in a 3-hour event. After a keynote speech by ALCN and an experts' panel on Circular Economy, Simos Malamis - Project Coordinator of HYDROUSA presented HYDROUSA's objectives and future plans as an extended and holistic strategy for water management with nature-based solutions and low carbon footprint technologies. During the last section of the Inauguration event, 6 different mini-workshops took place by the main partners who are responsible for each HYDRO. Participants were split into groups and discussed technical details and the strategy planned for each implementation site.

Figure 4.1 Inauguration event of HYDROUSA in Impact Hub Athens

## 4.2 Implementation phase:

### 4.2.1 Notice Boards of demo sites

All demo sites Notice Boards (Figure 4.2) were designed by IHA illustrating the solutions of HYDROUSA and demonstrating the specific interventions and the expected impact out of each solution implemented.

#### DESIGN SPECIFICATIONS

- **Content:** All Notice boards include a general description of the project's objectives and mission along with the project specific data (Extended and shorten Title, timeframe, budget, implementation period, EU respective funding scheme, Number of Partners). Each notice board has a unique QR code that leads to the HYDROUSA web page for visitors to obtain more information about the project.
- **Accessibility:** The notice boards include both English and Greek, in order to ensure that local people will be able to read in their mother tongue the project specifications. Special features are designed for blind people to have an audio description of the outlined text.
- **Graphics:** The overall aesthetics follow the guidelines of Task 9.2 Branding and Common Narrative, in terms of visuals, images and colour palette. All the notice boards include the overall circle of HYDROUSA, to showcase that each applied circular solutions on the demo sites are part of an enlarged circle that can be applied or be customised according to the needs of a potential replication site. The technologies applied at the specific demo site are highlighted in blue colour and a respective name tag is pointing out each HYDRO solution on the main graph.
- **Logos:** HYDROUSA Logo and EU logo are represented along with the logos of all the 28 project partners
- **Material-Installation:** The material used is either aluminium or plywood, layered with specific films to ensure durability and increase the life span (+5 years durability) protecting from rain, sun and wind. The Notice Boards are applied on each demo site (Figure 4.3), on highly visibility areas, either as standalone boards, or attached on fixed walls, ensuring that the visitor can take all the respective information.

Figure 4.2 Notice Board blueprint.

**Figure 4.3 HYDROUSA Notice Boards Installation**

#### **4.2.2 Open Day Demonstration activity of each demo - DEMO Site Open Days**

After the completion of the DEMO sites installation, several open days were organised to each of the locations to introduce the technologies to various stakeholders including, local authorities, farmers, young professionals, researchers, tourists and local population. The DEMO site leaders were preparing guided tours to showcase each stage of the circular solution, while there was always space for interactions and questions.

The first open demo site event was conducted in Tinos on September 10<sup>th</sup> 2020 with the presence of partners such as IHA, ALCN, PLANET RADKE and Municipality of Tinos (TINOS). A “Circular Walk” was performed in 2 parts, one in the morning and one in the afternoon in order to ensure that all relevant stakeholders would be able to attend but also in order to divide the amount of people participating in each workshop so that the necessary social distancing could be kept. In total, 42 people participated and in groups they were guided through the applications with the relevant partner (ALCN, RADKE, PLANET, TINOS) and with the coordination of IHA, demonstrating the technology, the thought process and the results expected from each application.

The partners hosted another session with a handful of them, the next day in the town of Tinos where the partners answered more technical questions that there was no time to indulge in during the open day event.

On the 15<sup>th</sup> of July 2021, we welcomed local stakeholders and citizens to the demo site of HYDRO1 & HYDRO2 in Antissa, Lesvos. They had the chance to get a first glimpse of the circular and regenerative applications that have been installed for the treatment of the domestic wastewater of Antissa village and its reuse for the management of the agroforestry system (HYDRO2). They also had the opportunity to taste the various fruits and vegetables produced from reclaimed water on the spot. Within the demo tour, the stakeholders included among other representatives from the Municipality of Western Lesvos, the Municipality of Mytilene, the Region of the North Aegean and the nearby Communities of Antissa, Eressos, Vatousa, Sigri. Throughout the tour, the NTUA and University of the Aegean representatives answered questions and discussed around the project, the circularity added value as well as the following planned activities on the island.

Another Open day was also released in June 2022 with Tinos Ecolodge and IHA, where the local population had the chance to get a guided tour of the premises of Tinos Ecolodge, introducing the circular applications and resource management for Water, Energy, Food production with an ecosystemic approach. Participants had the opportunity to participate in the live performance of the artistic residency “To Fall with Grace” highlighting the importance of water stress.

On Mykonos with Delaros, NTUA and IHA on the 7<sup>th</sup> of June 2022 there was a guided tour as part of CEMEPE and the International Conference on Environmental Management, Engineering, introducing more technical details on the technologies applied and on the solutions for rainwater harvesting and management. Meanwhile there have been hosting a series of workshops and events, including oregano harvesting, school visits, essential oils / distillery training and many more. In May 2023

On August 2022, the Cypriot Commissioner for the development of Mountainous Regions Mr Costas Champiaouris, his delegation and MEMIRA visited the HYDRO1 and HYDRO2 (10 participants). The Cypriot delegation is interested to apply such solutions in the mountainous regions in Cyprus and their visit was made after the successful workshop which was organized by HYDROUSA consortium in Cyprus. On 22 September 2022 the HYDROUSA consortium together with Ms Evdokia Achilleos (Head of Sector on Biodiversity, Circular Economy and Environment – REA) had a guided tour to the HYDRO1 and HYDRO2 demo sites in Antissa village within the framework of the 9<sup>th</sup> HYDROUSA management meeting (50 participants).

On October 2018, 2019, 2022 and on May 2023 and 2023, a total of five permaculture seminar groups were organized by Tinos ecolodge ELT through introducing along the activities that were developed with HYDROUSA. Also, a visit (Open Day) and demonstration was organized at the HYDRO5 demonstration site to introduce this nature based solution, with this approach. A total of 125 participants in total were educated and introduced about HYDROUSA solutions. The seminars were hosted in Tinos Eco-lodge welcoming the participants and learning in ELT premises where HYDRO6 is demonstrated. The seminar was hosted content wise by Peter Cow from England and assistant teachers Nicolas Bedau from Greece, Elena Symeonidou from Greece. The instructors combine their skills from both Northern and Southern ecosystems and climatic conditions and put emphasis on social permaculture as well as Regenerative agriculture, with lots of hands on and practicals during the course. The workshops are offering the Permaculture Design Certificate, an 80 hour theoretical course based on Bill Mollison’s Designers Manual, and the 35 years of creativity, research and development in the worldwide Permaculture movement since. It explores how we can use today’s tools and technology to create a more sustainable world.

On May 2023, a field trip of foreign Master students was realized to HYDRO1 and HYDRO2. Specifically, 22 M.Sc. students of the Mespom Erasmus Mundus Joint Masters’ Degree visited the sites. Information was given

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement No 776643

for the capacity and the treatment steps of HYDRO1 as well as for the monitoring program applied in HYDRO1 and HYDRO2. Discussion was done on the existing legislation and the potential risks from wastewater reuse.

In June 2023 as part of the Water innovation and Circularity Conference (WICC) a technical tour took place to Mykonos Island to visit the HYDRO3 and HYDRO4 demo sites. The visit was organized for the delegates of the Conference and more than 20 participants took place. After the guided tour, a practical workshop took place on the production of essential oil and soaps from oregano at the premises of HYDDRO3.

**Figure 4.4 HYDROUSA Open Days to HYDRO1 and HYDRO2**

**Figure 4.5 HYDROUSA Open Days to HYDRO3 and HYDRO4**

**Figure 4.6 HYDROUSA Open Days to HYDRO5 and HYDRO6**

Although our initial plan was to organise one Open Day per Demo Site, several activities took place on all the sites, providing a more experiential and practical experience to participants, interacting directly with the technologies, creating a stronger commitment and engagement. In total more than 10, dedicated open day events took place at the six demonstration sites with more than 285 participants. The openness and the accessibility of HYDROUSA sites, sparked also other local stakeholders that got interested in the solutions and approached DEMO site leaders to host introduction sessions. More details can be found on deliverable D9.6 Report on co-creation and training activities.

In total 33 activities of dissemination have been realised directly at the demo sites with more than 2,249 individuals have visited and interacted with our demo-site technologies and have experienced the efficiency of the practices that HYDROUSA apply to tackle water stress.

#### **4.2.3 Development Technology videos**

Six (6) technology videos were created showcasing the character of our technologies: dynamic, fresh, engaging, stimulating, cross generational. Our main message was an invitation for people to JOIN THE CIRCLE! The key objective was to showcase the engagement and the solution-oriented technologies of the project in a variety of target audiences from academic community to the local society. The structure of all the videos followed the same structure, including a key stakeholder, (e.g., Mayor of Tinos, Mayor of Mykonos, General Manager of Water Utility Service) that was introducing the island and its characteristics, on a positive note, while highlighting the challenges that they face in terms of resources management. This is where HYDROUSA comes with solutions. A demo site representative is introducing the technology that responds to the above challenges and guides us through the solution. The video wrap-up with the expected impact that we foresee from each application for the community and the environment. Although the videos they were completed during the last months of the project, they have more than 1590 views and will be the leading content for the dissemination and the possible replication of the technologies.

**Figure 4.7 Development of the videos for the HYDROUSA technologies**

### **4.3 Final Phase - Conference: Water Innovation & Circularity Conference (WICC)** ([www.wicc.gr](http://www.wicc.gr))

The Water Innovation and Circularity Conference (WICC) (Figure 4.8) was an immense success involving more than 220 key stakeholders and experts from across Europe, around all the burning topics of water management, treatment and reuse. Under that framework of HYDROUSA, The Hellenic Water Association together with the Sanitary Engineering Laboratory of the Department of Water Resources and Environmental Engineering of the National Technical University of Athens hosted the first WIC Conference. The objective was to exchange and elaborate on how Innovation can be coupled with circularity in the water sector to accomplish the transition from a linear to a circular economy. Through this event the consortium had the chance to present all the successfully demonstrated solutions of the valorisation of non-conventional water sources in remote, water scarce areas of the Mediterranean Region that were Implemented through HYDROUSA. The event hosted 123 scientific presentations with 20 sessions of oral presentations, 31 posters, 3 keynote speakers and 2 stakeholder workshops. Three of the Sessions of the oral presentations were devoted to the HYDROUSA findings showcasing the important results of the project. Furthermore, the HYDROUSA products were showcased. The three keynote speakers were given by:

- Guenter Langergraber from BOKU University (Austria) on *“Water - the key element in circular city”*
- Niki Frantzeskaki from Utrecht University (the Netherlands) on *“Planning and governance of and with nature-based solutions in cities”*
- Evdokia Achilleon from the Research Executive Agency (EC) on *“Water Innovation and Circularity supported by H2020 and Horizon Europe Programmes”*

The Conference was attended by scientists and researchers from Universities and Researcher organizations, representatives from water authorities and Municipalities, NGOs and SMEs. Regarding the two workshops, one was the Water Projects Europe (WPE) workshop on *“Circular Water Solutions for a Water-Smart Society”*

which was co-organized by the Water Europe with NTUA and HYDROUSA, which was a liaison workshop between different EU-funded project. The second workshop focused on the challenges that the Revision of the Urban Wastewater Treatment Directive (91/271/EEC) brings to water utilities and many Greek water utilities participated in person. More details on the two workshops are given at the D9.5 “Report on Networking and Marketing Activities”

**Figure 4.8 HYDROUSA Final conference WICC 2023**

For the implementation of the event dedicated graphic materials were developed to communicate the objectives, communicate the structure of the three days conference and honour the contributors (Figure 4.9 and Figure 4.10). (Including physical - digital banners, conference booklet, leaflet, nametags)

**Figure 4.10 HYDROUSA - WICC - Promo Material - Final Conference WICC 2023**

## 5. NETWORKING, MARKETING CLUSTERING EVENTS (T9.5)

HYDROUSA partners, through their participation in local and international conferences, workshops, pitching sessions and trade fairs, were actively networking and promoting the mission and the activities of HYDROUSA, in order to create a more systemic change inform about the solutions, inform and influence industry and policy. Most importantly HYDROUSA played an important role to contribute and inform policy on circular practices for water management, but also got awarded and recognised by established institutions and networks for its contribution to the circular transition. It's worth mentioning the elements below. **These activities are described in D9.5 "Report on Networking and Marketing Activities"**. Here the prominent awards that the project received are mentioned.

### PRIMA WEFE NEXUS AWARDS

The Award was announced during the last day of [WEFE4Med](#) Conference by the Director of **DG Research and Innovation of the EC, Mr. John Bell**. It is an Award given by the PRIMA foundation.

Figure 5.1 HYDROUSA - PRIMA WEFE NEXUS AWARDS

### Mediterranean Climate Change Adaptation Awards

Delighted to receive the first prize of the "[Mediterranean Climate Change Adaptation Awards](#)" under the Category Preservation of ecosystems and nature-based solutions among 55 applications.

Figure 5.2 HYDROUSA - Mediterranean Climate Change Adaptation Awards

### Green Tech Award for Best European Project for the environment

HYDROUSA also received the **Green Tech Award for Best European Project for the environment** at the [2022 Verde-tec expo](#).

Figure 5.3 HYDROUSA - Verde.tec AWARD

The efforts and the results of these tasks are extensively described at D9.5 Report on the networking and marketing activities and to the respective Deliverable of WP8 on Exploitation, D8.4 Marketing Activities.

### OTA Awards

HYDROUSA and the Municipality of Western Lesvos received in June 2023 the award in the category “Solid and liquid waste - Waste collection technologies, handling and transport” highlighting the benefits of the citizens from the use of the garbage truck driven by the biogas produced in the Antissa unit through HYDRO1. The Local Government Organization Awards 2019-2023 - OTA AWARDS 2023, are the only awards in Greece addressing exclusively Primary & Secondary Local Government Organizations (municipalities and regions), highlighting and rewarding actions and projects for Innovation, Sustainability, Quality of Life of Cities but also Citizen Services. The award ceremony will take place in September 2023 in Athens.

Figure 5.4 HYDROUSA - OTA awards

## 6. USER REQUIREMENTS CO-CREATION & TRAINING ACTIVITIES (T9.6)

The main focus of T9.6 is realizing activities for community engagement, collecting input, including the public and stakeholders in the decision-making process for system design specifications and engaging them in the evaluation process of HYDROUSA systems through co-creation activities.

A participatory model was used in order to develop a comprehensive plan for engaging the community. The objectives of the participatory approach were: reaching out the community to get actively involved, delivering HYDROUSA's message through experiential, co-creative workshops, connecting emotionally the community with our solutions, creating loyalty and educating the community to a solution-oriented approach.

The detailed approach is described at deliverable D4.1 "Plan for participatory model for community engagement" and its strategy at deliverable D9.1 "Dissemination, Communication and Community Engagement Plan".

The co-creation and Training activities reached more than **2,459 people** that were directly involved with HYDROUSA solutions in different capacities. The analysis of co-creation and training activities implemented during the period M1-M60 can be found at D9.6 "Report on the co-creation and training activities" measuring the overall objectives and the outcomes against the KPIs.

**Figure 6.1 Co-creation activities**

## 7. CITIZEN SCIENCE ACTIVITIES

The inputs - the outputs from the implementation of HYDROUSA Demo-Sites along with the values and the principle of HYDROUSA led to the development of an online game promoting the solutions and the applied systems across citizens and various stakeholders.

The game was developed based on the previous experience of Horizon2020 GATES gaming platform, by AGENSO a platform developed based on a white-label practices, and with the design-principle of customisation in order to cater specific needs and requirements of the different potential customers and end-users.

HYDROUSA game was inspired by all the applied solutions and systems and is based on the 6 applied demo sites, in the form of a mission-secure, manage and distribute the natural resources in the most efficient and sustainable way, to make the people of the community happy! In that sense the user is becoming the decision maker, having the power of will and becoming the solution maker for a series of externalities as game scenarios (e.g., dry seasons, labour strikes etc.). The game is optimising weather and crop simulation models, irrigation modelling, modules for economic and environmental performance analysis.

The game offers both the satisfaction, the motivation but also a challenging frustration, making it attractive for the player. HYDROUSA game is available for mobile devices free of charge and is also available for download through HYDROUSA website. The development of the game and its objectives are extensively analysed in deliverable D9.7 "HYDROUSA game for increased public awareness". The game is also available in [Google play for android](#).

**Figure 7.1 HYDROUSA - Citizen Science - Final Conference WICC 2023**

Citizen science activities are related to the co-creations channels that were deployed. Different strategies to engage with the respective audience and bring research methodologies and findings closer to the wide public. One of the overall strategies was related to opportunities that were given to citizens, initially prior to the

design of the solutions for user-input and co-design, but also in later stages of the project, were citizens were actively engaging with the demo sites during, open-days, school visits and summer camps.

During the co-creation activity held at Antissa Village in December 2018, the local citizens played a crucial role by suggesting the reintroduction of traditional crops that were historically cultivated in the region. These traditional crops had been replaced by extensive monoculture fields, primarily focused on olive trees due to their economic benefits. Remarkably, 70% of the citizens' suggested crops were successfully implemented at the agroforestry site of HYDRO2 in Lesvos. Additionally, a dedicated Ethnobotanical study (ALCN) was conducted based on their inputs.

Moreover, the co-creation activity had a positive impact on the local community by creating 85 job opportunities. These job positions were directly linked to the design, construction, and monitoring of the systems, offering valuable upskilling opportunities to the local population in the fields of farming, construction, and energy. As a result, the project fostered new circular approaches to sustainability, empowering the community with innovative techniques and practices, bridging the gap between science and citizens and involving the locals in the actual, outputs and outcomes.

## 8. RISKS AND MITIGATION STRATEGIES

### Data Collection- Data accuracy

As the consortium enhanced the participation of 28 partners from 10 different countries, there was the need for consistent reporting on dissemination and communication activities by all the consortium partners, to ensure the collective coverage/harvesting of all the actions taken and data accuracy.

As of the completion of each communication/dissemination activity IHA with NTUA encouraged the partners to fulfil the respective google form, that was created as in detail described in Section 2.1.3 of this report, in this way there will be more “fresh” information that could be used in the social media channels, the e-newsletter, the website etc.

According to the implementation-strategy, the form was distributed quarterly and filled by the partners and was submitted to the DCM. During the 60 months of the project, 632 entries have been performed and submitted to the online form. In order to ensure maximum efficiency on the reported activities, every 6 months an extra form of the log activities per partner was issued and sent to every consortium member to validate the relevant entries or add communication and dissemination actions that were not reported.

### Restriction of Physical Meetings, Conferences, Activities

A threat in the dissemination and communication of the project was the global health crisis with the COVID - 19 pandemic and the challenges it has created in physical meetings, seminars, conferences and to the overall socioeconomic status quo. Physical meetings are essential in order to create a robust community. Not being able to organise as many as necessary could be a bottleneck for the objectives of the project. However, we implemented mitigation practices, to overcome these challenges and deliver the expected results. The mitigation plan was to focus on the online presence through our social media, press releases, e-newsletter, etc., but also continue with the online content creation and delivery we had started already with webinar series, online meetings, workshops and presentations.

Some of the meetings had to be adjusted or transformed into hybrid set ups in order to meet the regulation directives. The Tinos Open Day- Circularity Walk was organised in the open space, in smaller groups in order to have as many people as possible following the developments of the site, while aligning with the government COVID-regulations.

Throughout the pandemic, people became more acquainted to use digital means to communicate and to participate in various activities. HYDROUSA took a stand on this trend, so that the objectives and KPIs could be reached.

The series of webinars was a case study to stay connected with our global community, while raising awareness on the nature-based solutions developed. Whenever possible, and according to the governmental regulation, there were physical meetings organised, in smaller repetitive groups of people. Additionally, more personal meetings and one to one interviews were organised as an alternative to group activities. In this way the community stays active and participates through the dissemination and community building activities of the project.

### Diversity in Target Audiences

It was also essential to communicate new and fresh content so that the attention of the different target audiences can be kept. One of the challenges faced was how to create content that is relevant and appealing to the diverse target audience (from local population to scientific community and from investors to public authority representatives etc.) by deploying both marketing-communication techniques and without the use of high technical terminology. One of the most engaging content formats was the format of videos as it is also seen, in the case of the animation video, as its more engaging and aesthetically attractive. The technology videos were also uploaded in the HYDROUSA Youtube channel, used as important tools for the project dissemination and for the exploitation of the project.

## 9. KPIs

Below (

Table 9.1) there is an extended analysis of the KPIs (Key Performance Indicators), as described in the Grant Agreement and in D9.1 Dissemination and Communication Plan. All of the goals are met, as the HYDROUSA project has already received wide recognition among diverse networks and target audiences.

**Table 9.1 Key Performance Indicators (KPIs)**

Performance Indicator	M1-M24	M1-M60	Total Goal	Achievement %
Visitors to the Website (based on Google Analytics)	9846	<b>43,089</b>	28000	154%
References to the project in other websites	63	<b>146</b>	100	146%
Followers on social networks Twitter; Facebook; LinkedIn	3636	<b>6,500</b>	1200	542%
Posts on social networks relevant to project	418	<b>1,568</b>	1200	131%
Online and offline press releases	40	<b>112</b>	40	280%
Scientific publications in peer-reviewed journals	2	<b>17</b>	15	113%
Presentations at International Conferences	39	<b>185</b>	27	685%
Co-creation workshops implemented	2	<b>10</b>	3	333%
Participants in co-creation workshop	120	<b>246</b>	200	123%

## 10. CONCLUSION

HYDROUSA project has successfully implemented a comprehensive and dynamic dissemination and communication strategy that has achieved remarkable results over its 60-month duration. As this report unfolded the results the various activities carried out to disseminate the project's goals, outputs, and outcomes, we are proud to over achieve our goals, reaching a broad spectrum of target audiences, from the local community to global stakeholders, but most importantly contributing in tangible ways for the continuation of the project, creating a more water conscious local community, providing solutions and bright examples of circularity for the scientific community the industry and the policy makers, contributing to the transition to a more circular and sustainable future.

Throughout the project, the consortium has been highly committed to communication and dissemination, which has led to significant achievements and a broad impact. The report highlighted those key findings and milestones, including:

- a vivid online Presence and Engagement: The project's website received a substantial number of visitors, surpassing the original target by 154%. The project achieved a 542% increase in social network followers and posted 131% more content than initially planned. Online press releases were also abundant, exceeding the target by 280%.
- A significant contribution to scientific Publications: and results. The project surpassed its goal for scientific publications (17 submissions out of 15 that was the initial goal), contributing valuable knowledge and insights to the academic and research community in areas such as circular economy assessment, nature-based solutions, and water resource management.
- A Global Reach: HYDROUSA conducted activities in various countries across different continents, illustrating the project's global relevance. This international presence helped validate the project's approach to decentralized circular solutions and demonstrates its potential impact on a global scale.
- Collaborations and Networking: The project successfully engaged with a wide range of stakeholders, including cities, universities, research institutions, and governmental bodies, establishing strong partnerships that contribute to the sustainability and resilience of the project's results.
- Awards and Recognition: The above-mentioned awards validate the project's contributions to circular water management practices and the transition to a more sustainable future.
- A Community of Water Allies: The project successfully engaged with the local community, involving them in co-creation activities and allowing them to provide input on the project's design and specifications. This approach not only enriched the project's outcomes but also created employment opportunities and upskilling for local populations.
- Citizen Science Activities: The development of an online game and various community engagement strategies promoted the project's solutions and created opportunities for citizens to actively participate and learn more about nature-based systems and sustainable resource management.

In conclusion, the HYDROUSA project's commitment to dissemination and communication has not only met but exceeded its key performance indicators, delivering innovative and user-centred activities with the focus on the people & the planet, increasing scalability and tenacity for our communities. With its wide-reaching impact, the project has laid a strong foundation for the future, positioning itself as a pioneer in circular water management practices and inspiring global action. This work is deriving from all the people who contributed to these results and showed a strong dedication to shaping a more sustainable and resilient water future, showcasing its potential for further knowledge transfer to future initiatives and generations.

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement No 776643

## 11. ANNEX (LIST OF ACTIVITIES)

	Date	Organization	Activity	Name of event	Title	Place	Type of audience	Size of audience
1	21-Feb-2018	AGENSO	Workshop	AgTech & FoodTech Mixer by HETiA	AGENSO presentation	Koropi, Athens, Greece	Industry, Business network	50
2	9-Apr-2018	Planet	Participation in Conference	Desalination for the Environment: Clean Water and Energy Science, Research, Innovation, Industry, Business	Improvement of a bio-inspired solar stills system for land regeneration in drylands	Athens, Greece	Scientific community, Strategic partners, Water authorities, Investors, Local authorities, Civil Society	100
3	16-May-2018	NTUA	Press Release	European Commission	Demonstration of water loops with innovative regenerative business models for the Mediterranean region	Online	European Commission, Scientific community, Business network	100
4	12-Jun-2018	NTUA	Pitch	Promoting market-ready water innovations: Investor café	Demonstration of water loops with innovative regenerative business models for the Mediterranean region	Brussels, Belgium	European Commission, Scientific community, Business network, Potential end-users, Investors	200
5	13-Jun-2018	NTUA	Workshop	ICT4Water Cluster and WssTP digital working group "Smart water services: Bridging the digital and the physical world"	Water in the context of the circular economy, Water Value Chains vision: HYDROUSA	Brussels, Belgium	European Commission, Scientific community, Industry	50

583	7-Jun-2023	NTUA	Participation in Conference	Water Innovation & Circularity Conference (WICC)	Impact of treated wastewater irrigation on soil microbial communities	Athens, Greece	Scientific community, Water authorities, Local authorities	240
584	7-Jun-2023	NTUA	Participation in Conference	Water Innovation & Circularity Conference (WICC)	Fate of antibiotic resistant bacteria and genes in a novel nature-based system for wastewater treatment and reuse	Athens, Greece	Scientific community, Water authorities, Local authorities	240
585	7-Jun-2023	NTUA	Participation in Conference	Water Innovation & Circularity Conference (WICC)	Operation of a novel seawater solar desalination system for freshwater recovery	Athens, Greece	Scientific community, Water authorities, Local authorities	240
586	7-Jun-2023	UNIVPM	Participation in Conference	Water Innovation & Circularity Conference (WICC)	Replication service tool to assess the feasibility of solutions for alternative water source recovery	Athens, Greece	Scientific community, Water authorities, Local authorities	240
587	7-Jun-2023	IRIDRA	Participation in Conference	Water Innovation & Circularity Conference (WICC)	Multistage constructed wetlands for agricultural treated wastewater reuse in Class A of EC Regulation 2020/741: insights from the long-term monitoring of HYDRO1 in Lesvos Island, Greece	Athens, Greece	Scientific community, Water authorities, Local authorities	240
588	7-Jun-2023	ICRA	Participation in Conference	Water, Innovation & Circularity Conference (WICC)	Fertigation with UASB-CW reclaimed wastewater in a water scarce area and micropollutant uptake in lettuce plants	Athens, Greece	European Commission, Scientific community, Industry, Policy makers, Water authorities, NGOs	200
589	7-Jun-2023	ICRA	Participation in Conference	Water, Innovation & Circularity Conference (WICC)	POSTER Pharmaceuticals in lettuce irrigated with treated wastewater under real agricultural practices: human exposure and risk assessment	Athens, Greece	European Commission, Scientific community, Industry, Policy makers, Water authorities, NGOs	240
590	7-Jun-2023	ICRA	Participation in Conference	Water, Innovation & Circularity Conference (WICC)	Pharmaceuticals in a demonstration-scale agricultural field irrigated with reclaimed water	Athens, Greece	European Commission, Scientific community, Industry, Policy makers, Water authorities, NGOs	240

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement No 776643

591	7-Jun-2023	ICRA	Participation in Conference	Water, Innovation & Circularity Conference (WICC)	POSTER The case study of the Balearic Islands of Mallorca, Cabrera, and Formentera: theoretical feasibility assessment of water loops	Athens, Greece	European Commission, Scientific community, Industry, Policy makers, Water authorities, NGOs	240
592	7-Jun-2023	IHA	Participation in Conference	Water Innovation and Circularity Conference	<a href="https://wicc.gr/">https://wicc.gr/</a> - website visits	Athens, Greece	European Commission, Scientific community, Strategic partners, Policy makers, Water authorities, Potential end-users, NGOs, General public, Civil Society	1783
593	8-Jun-2023	alchemy-nova Greece	Trade fair	Forward Green Expo- 1st International circular Economy expo Thessaloniki	HYDROUSA Booth - Posters, videos, game & replication tool	Thessaloniki, Greece	European Commission, Scientific community, Industry, Media, Business network, Strategic partners, Policy makers, Water authorities, Potential end-users, NGOs	5000
594	8-Jun-2023	Water Europe	Organisation of HYDROUSA event	Water Innovation & Circularity Conference (WICC) #liaison	Water Projects Europe (WPE) Workshop: Circular Water Solutions for a Water-Smart Society Exploring Water-Oriented Living Labs Innovations	Athens, Greece	Scientific community, Water authorities, Local authorities	200
595	8-Jun-2023	NTUA	Participation in Conference	Water Innovation & Circularity Conference (WICC) - jointly with other H2020 projects	HYDROUSA presentation in Water Projects Europe (WPE) Workshop: Circular Water Solutions for a Water-Smart Society Exploring Water-Oriented Living Labs Innovations	Athens, Greece	Scientific community, Water authorities, Local authorities	200
596	8-Jun-2023	NTUA	Organisation of HYDROUSA Event	Water Innovation & Circularity Conference (WICC) #liaison	Workshop in Greek on the Revision of the Urban Wastewater Treatment Directive #Liaison	Athens, Greece	Scientific community, Water authorities, Local authorities	220
597	9-Jun-2023	IRIDRA	Participation in Conference	Water Innovation & Circularity Conference (WICC)	HYDRO-1, route towards the Environmental Technology Verification (ETV) for agricultural treated wastewater reuse in Class A of EC Regulation 2020/741	Athens, Greece	European Commission, Scientific community, Water authorities, NGOs	200

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement No 776643

598	9-Jun-2023	UNIVPM	Participation in Conference	Water Innovation & Circularity Conference (WICC	Replicability of HYDRO solutions for alternative water recovery in 15 decentralised regions	Athens, Greece	Scientific community, Water authorities, Local authorities	200
599	9-Jun-2023	NTUA	Participation in Conference	Water Innovation & Circularity Conference (WICC)	A novel rainwater circular solution as a distributed intervention to increase the resilience of water scarce decentralized communities: a real world demonstration in the Mykonos Mediterranean Island	Athens, Greece	Scientific community, Water authorities, Local authorities	200
600	9-Jun-2023	NTUA	Participation in Conference	Water Innovation & Circularity Conference (WICC)	Treated wastewater irrigation impact on soil nematode community	Athens, Greece	Scientific community, Water authorities, Local authorities	200
601	9-Jun-2023	SEMIDE	Participation in Conference	Water Innovation & Circularity Conference (WICC	Socioeconomic and regulatory feasibility of HYDROUSA solutions: Outcomes from the replication sites in the Mediterranean and Middle East regions	Athens, Greece	Scientific community, Water authorities, Local authorities	200
602	9-Jun-2023	NTUA	Participation in Conference	Water Innovation & Circularity Conference (WICC)	Development and operation of a novel rainwater harvesting solution in remote, water scarce areas	Athens, Greece	Scientific community, Water authorities, Local authorities	200
603	9-Jun-2023	NTUA	Participation in Conference	Water Innovation & Circularity Conference (WICC)	Nitrogen recovery from urine using zeolite	Athens, Greece	Scientific community, Water authorities, Local authorities	200
604	9-Jun-2023	NTUA	Participation in Conference	Water Innovation & Circularity Conference (WICC)	Investigating the effect of reclaimed water use on corn plant	Athens, Greece	Scientific community, Water authorities, Local authorities	200
605	9-Jun-2023	NTUA	Participation in Conference	Water Innovation & Circularity Conference (WICC)	HYDROUSA game: A serious game for engaging stakeholders with HYDROUSA innovations	Athens, Greece	Scientific community, Water authorities, Local authorities	200
606	9-Jun-2023	IHA	Participation in Conference	Water Innovation & Circularity Conference (WICC	Best practise of community engagement within HYDROUSA project	Athens, Greece	Scientific community, Water authorities, Local authorities	200
607	9-Jun-2023	ICRA	Participation in Conference	Water, Innovation & Circularity Conference (WICC)	Small island sustainability towards water circularity: a nature-based solution to produce aromatics in Santa Maria Island (Azores, Portugal)	Athens, Greece	European Commission, Scientific community, Industry, Policy makers, Water authorities, NGOs	200
608	9-Jun-2023	NTUA	Media Briefings	ERT1 TV	<a href="https://www.ertflix.gr/vod/vod.278721-periballon-39">https://www.ertflix.gr/vod/vod.278721-periballon-39</a>	Online	Public	50000

This project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement No 776643

609	10-Jun-2023	NTELAROS	Organisation of HYDROUSA Event	Water, Innovation & Circularity Conference (WICC)	HYDRO3 and HYDRO4 Technical Tour	Mykonos (Greece)	Scientific Community, EC, Private companies	20
610	10-Jun-2023	NTELAROS	Co-creation activity	Mykonos goes Circular - Alternative Practices #cocreation	Essential Oils Workshop - Exploring By Products	Mykonos (Greece)	Scientific Community, EC, Private companies	20
611	11-Jun-2023	ICRA	Participation in Conference	ICCE 2023 - 18th International Conference on Chemistry and the Environment	Wastewater-derived organic contaminants driven by reclaimed wastewater reuse in agricultural irrigation: dietary exposure and potential risks to the environment and human health	Venice, Italy	Scientific community, Policy makers, Water authorities	500
